

Terms and Conditions for Cloud Management with Device Configuration

Use of and access to cloud management with device configuration features in the Meraki Dashboard are governed by the Meraki Offer Description and Cisco General Terms (the "Terms"). Any terms applicable to your Catalyst devices prior to enrollment in cloud management with device configuration (e.g., hardware warranty, end of life policy, technical support) continue to apply. By using cloud management with device configuration you agree to the Terms and further agree that certain mandatory configurations will be pushed to your enrolled Catalyst wireless controllers devices as further described [HERE](#) and for Catalyst switches as further described [HERE](#).
